CONSULTANT / CONTRACTOR APPROVAL

Model KK6

The Marshall **Model KK6, AT1, AV1** Multi-Product Holding Units feature our ThermoGlo™ heating technology. Heat radiates from every square inch of the upper and lower flat plate surfaces. This eliminates the need to clean intricate calrod, wire and reflector assemblies.

The **Models KK6, AT1 and AV1** are designed to accommodate a full size (12"x 20") steam table pan. The **Model KK6** has swing-out Lexan® doors on three sides prevent drafts from cooling food items and allow easy access. The sloped bottom design of the KK6 displays your food product from countertop surfaces. A precision digital display and digital "set point" temperature controller maintain consistent product temperature.

All Marshall products are supported by a nationwide service organization and in-house, full-time Customer Support Department. To place an order call:

**ETL (US & Canada) & NSF Listed
FOR COMMERCIAL USE ONLY**

Marshall's Multi-Product Holding Unit features ThermoGlo™ technology designed to solve demanding food warming and holding requirements.

FEATURES

- Microprocessor controls exact heat intensity to furnish a specific temperature
- Delivers a wide range of temperature capabilities to fill exact warming and holding requirements
- Flat surface allows for easy wipe-clean application
- Food stays "presentation ready" longer because exact internal temperatures can be reached faster and maintained longer
- Stacking kit option allows double capacity in the same table space
- Illumination provided by (2) 40-watt food grade coated bulbs

CONSTRUCTION

- Heavy gauge stainless steel
- Designed and built to custom specifications with heat radiating from the ThermoGlo™ surfaces
- Designed with a flat unbreakable heat radiating metal face encased in stainless steel housing
- Tough Lexan® doors on three sides prevent drafts (KK6 Model only)
