## Model VT-15

### Vertical Pita Grill

Item No: \_\_\_\_\_

AIA FILE NO./ SPEC NO.

CONSULTANT/ CONTRACTOR APPROVAL

Model VT-15

The Marshall Vertical Grill produces a grilled effect on the sides of pita bread, tortillas and other flat bread. The bread is inserted at the top of the unit and is pressed against two heated platen surfaces, which are covered by replaceable platen sheets. The product is then discharged onto a product slide at the bottom of the unit. The system is variable speed. Additionally, there are heat controls for the surface temperatures. These controls are accessed from a touch screen located on the front cabinet (4 products can be preset). The flexibility of this grill allows for different thicknesses of bread and produces hot bread in the shortest time.

All Marshall products are supported by a nationwide service organization and in-house, full-time Customer Support Department. To place an order call:
