

ThermoGlo™

Model AP8 Series Dump Station Heater

Item No: _____
AIA FILE NO./ SPEC NO. _____
CONSULTANT/ CONTRACTOR APPROVAL _____

Model AP8

The Marshall **Model AP8** Series Dump Station Heater features our ThermoGlo™ heating technology. Heat radiates from every square inch of the upper flat plate heating surface. This eliminates the need to clean intricate calrod, wire and reflector assemblies.

This unit is designed to mount on virtually any fryer manufacturer's dump station, including **AP8** for gas or **AP8B** for electric. French fries, onion rings and hush puppies are ideal food products for this technology.

All Marshall products are supported by a nationwide service organization and an in-house, full-time Customer Support Department. To place an order, call:

1-800-627-8368

Marshall's **AP8 Dump Station Heater** incorporates **ThermoGlo™** technology designed to solve demanding warming and holding temperature requirements.

FEATURES

- Delivers a wide range of temperature capabilities to fill exact warming and holding requirements
- Flat surface allows for easy wipe-clean application
- Food stays "presentation ready" longer because exact internal temperatures can be reached faster and maintained longer

CONSTRUCTION

- Heavy gauge stainless steel.
- Designed and built to custom specifications with heat radiating from the flat top surface
- Designed with a flat unbreakable radiating metal face encased in stainless steel housing

**ETL (US and Canada) & NSF Listed
FOR COMMERCIAL USE ONLY**
